

Lalit Mohan

lalitg6376@gmail.com | +91 6376744236 | Alwar

CAREER OBJECTIVE

Motivated and detail-oriented Machine Learning enthusiast with hands-on experience in building real-world ML projects. Strong foundation in Python, data processing, and model development. Passionate about solving practical problems using AI

EDUCATION

B.Tech, Artificial Intelligence And Machine Learning 2025 - 2028 Mitrc

CGPA: 7.88/10

Diploma, Mechanical Engineering 2021 - 2024 Government Polytechnic College, Alwar

CGPA: 7.54/10

PORTFOLIO

[GitHub link](#)

[Linkedin link](#)

PROJECTS

[Drug Discovery virtual screening](#)

Developed a machine learning model for virtual drug screening and bioactivity prediction using molecular datasets. Performed data preprocessing, feature engineering, predictive modeling, and dashboard visualization using Power BI. Achieved 88.5% model accuracy. Tech stack : Python, Pandas, NumPy, Scikit-learn, Power BI, Machine Learning

[AI power job recommendation system](#)

Built a full-stack job recommendation system using Flask and MySQL. Designed backend APIs to process user data and job listings. Implemented filtering and matching logic for personalized job suggestions. Technologies: Python, Scikit learn, Pandas, HTML, CSS, Flask, MySQL

[SmartML pipeline](#)

Developed an AutoML web application that performs data cleaning, visualization, and model building. Implemented Random Forest Classifier and Regressor for prediction tasks. Displayed model performance using Accuracy, R^2 score, and Confusion Matrix. Technologies: Python, Scikit-learn, Pandas, Matplotlib, HTML, CSS, Flask

[Power BI Dashboard projects](#)

Developed a house price prediction model using Scikit-learn (R^2 : 0.65, MAE: 34.1, RMSE: 83.8). Built backend using Flask APIs and integrated with frontend.

Experience

Machine Learning | Future Intern

May 2026 - June 2026 ([Internship projects](#))

- * Worked on machine learning and data analysis tasks using Python and Scikit-learn
- * Performed data preprocessing, feature engineering, and model evaluation on real-world datasets.
- * Built predictive ML models and created visualizations for data analysis.

Skills:

Programming Languages:

Python,SQL

Libraries & Frameworks:

Pandas,Numpy,Scikit-learn,Matplotlib,Flask

Tools & Platforms:

MySQL,Git,Github,Jupyter Notebook,Power BI
