TECHNICAL SKILLS

Languages: C/C++, java, Python, JavaScript
Web Development: HTML, CSS, React.js, Node.js, Express.js, Spring Boot
Styling & Libraries: Bootstrap, Tailwind CSS, Material UI, Redux Toolkit
Tools & Databases: Git, GitHub, Git, Postman, Render, Google Gemini API, OpenAI, Microservices, MVC, Chrome Extensions, MySQL, MongoDB, OOP Concepts

EXPERIENCE

AI Intern Jun 2025 – Present
Nidya Medin Pvt Ltd Remote

Project: Deep Learning Framework for Diabetic Retinopathy Detection

- Built a CNN-Transformer pipeline for classifying retinal fundus images into DR severity levels.
- Used Vision Transformers (ViT), Swin Transformers, and hybrid CNN-Transformer models on public datasets (APTOS 2019, EyePACS).
- Evaluated model performance using Accuracy, ROC-AUC; applied Grad-CAM and LIME for visual explainability.

PROJECTS

Full Stack Project with MERN Stack | Job Portal Application

- Built a full-stack job portal application using MERN stack (MongoDB, Express.js, React.js, Node.js) with secure user authentication and role-based access (job seeker and recruiter).
- Implemented core features like job posting, job search, application tracking, and recruiter dashboard with RESTful APIs.
- Designed responsive UI using React and managed state efficiently for seamless user experience across the platform.

AI-Powered Email Writer Assistant

- Developed an AI email-writing assistant with Spring Boot backend, React frontend (Vite), and Google Gemini API for context-aware replies.
- Integrated a Chrome Extension for seamless Gmail inbox interaction with real-time, editable AI-generated suggestions.
- Built a modern, responsive UI with React + Bootstrap, enabling professional email drafting and quick replies.

LLM Chat App (LangChain + TinyLlama) | Python, Streamlit, LangChain, Ollama

- Developed an AI-powered chatbot using LangChain and TinyLlama for efficient local LLM inference.
- Built an interactive UI using Streamlit for real-time conversational responses.
- Integrated Ollama for running lightweight language models locally with optimized performance.
- Enabled context-aware conversations using prompt engineering and memory management.

Code Reviewer (AI-Based) | React, Node.js, Gemini API

- Developed an AI-powered code review tool that analyzes user-submitted code and provides real-time feedback and suggestions.
- Integrated Google Gemini API to detect bugs, improve code quality, and suggest optimizations across multiple programming languages.
- Built a responsive React frontend with a Node.js backend for handling API requests and processing code evaluation efficiently.
- Focused on improving developer productivity by automating code review and feedback generation.

CERTIFICATIONS

• Data Science for Engineers, NPTEL	Jul-Sep 2024
• Introduction to Machine Learning, NPTEL	Jul-Sep 2025
• Deep Learning, NPTEL	Jul-Oct 2025
• Data Science and Machine Learning, YBI Foundation	2025
• Data Science Bootcamp, GeeksforGeeks	2025

Positions of Responsibility

• Training and Placement Coordinator	2026-Present
• WordPress coordinator	2026-Present
• Technical Head, Google Developer Group (GDG)	2025

EDUCATION

Govt. Mahila Engineering College, Ajmer, Rajasthan
B.Tech in Computer Science & Engineering, CGPA: 9.1 Sep 2023 – Mar 2027

St Karens High School, Patna
X (CBSE) - 91%, XII (CBSE) - 85% 2021 – 2023
